Female (% females to all employees in each quartile)	91.71%	85.25%	78.34%	62.67%

Supporting Statement

As an Educational Trust, we are aware that 50% of our employees are teaching staff, who are generally paid at higher levels than their support staff colleagues. Male employees make up 21% of the whole workforce with broadly 73% of these being employed as qualified teachers. Support staff work in varied roles, many of them part time, to ensure our schools operate effectively and efficiently. The vast majority of these support roles are performed by female employees with some roles being just a few hours per week. The report format contrasts these part time support roles with full time roles and exacerbates the pay differences between female and male colleagues. This report would provide greater clarity by separating Teaching and Support staff as well as Senior Management. Nonetheless we are confident that all of our roles are evaluated to ensure fair pay with no gender bias.

I confirm that the information published here is accurate.
